TOTAL CLADDING SOLUTIONS

# Parklex<sup>®</sup>

**Parklex Facade** is a high-density stratified timber panel manufactured from kraft paper treated with resins thermoset under high pressure and temperature, finished with natural timber veneers highly resistant to UV radiation and atmospheric agents. With a variety of finishes and colours in natural and dyed panels available, the product also reveals the simple, natural beauty of the wood it is manufactured with. Panels available to be used in both internal, and external applications.

Some key points to note:

- Water Resistant
- Sun/ UV Resistant
- Natural realwood Veneer
- Long Term Performance
